English

Professional Proficiency

Swahili

Native

PROFESSIONAL SUMMARY

Backend and systems programmer with strong expertise in Go, Git/version control, and building reliable, high-performance backend systems. Skilled in systems programming, networked applications, and applying efficient algorithms and data structures to solve complex problems. Experienced in Linux environments and open-source workflows, with a focus on scalable, maintainable, and high-quality code. Passionate about designing robust architectures and optimising server-side performance.

WORK EXPERIENCE

Software Engineer

Jan 2026 – Present

Zone01 Kisumu · Kisumu, Kenya

- Design and build scalable, production-ready backend services in Go.
- Develop and document RESTful APIs consumed by internal and external clients.
- Optimise server-side performance through profiling and algorithmic improvements.
- Collaborate via Git in a peer-review workflow, maintaining rigorous code quality standards.
- Contribute to open-source projects and internal tooling within a Linux-first environment.

KEY PROJECTS

HTTP Server from Scratch

Go

Built a concurrent HTTP/1.1 server in pure Go, handling routing, middleware, and persistent connections with zero third-party dependencies.

Distributed Task Queue

Go · Redis

Designed a lightweight job queue with worker pools, retry logic, and real-time monitoring via WebSockets.

CLI DevTools Suite

Go · Bash

Developed command-line utilities for log analysis, file diffing, and process management, used daily by the team.

ADDITIONAL COMPETENCIES

- Microservices Architecture
- JWT / OAuth2 Authentication
- Message Queues (Kafka / RabbitMQ)
- Unit & Integration Testing
- Concurrency & Multithreading
- Performance Profiling & Tracing
